European integration has been most successful at a legal level and European influences have left an indelible mark on English public law. These influences must be understood by students and practitioners if they are to understand our public law and its continuing development. This new book aims to cover the debate surrounding the influence of community law on the public law of the United Kingdom in a thematic and analytical manner.

This pioneering and in-depth study into the regulation of shale gas extraction examines how changes in the constitutional set-ups of EU member states over the last 25 years have substantially altered the legal leverage of environmental protection and energy security as state objectives as well as offering the first formal assessment of the legality of fracking bans and moratoria. Ruven Fleming further proposes a new methodology for the development of legally sound regulation of new energy technologies in the context of the energy transition.

First published in 1997, Article 224 is one of the most powerful articles of the Treaty of Rome, allowing a member state to take unilateral measures and to suspend some or

all its treaty based obligations in times of what can loosely be described as serious internal turmoil or external threat it is for this reason that the very next article of the treaty article 225 allows the commission or a member state to challenge invocation of art 224 before the european court of justice ecj on grounds of improper use in practice the use of art 224 by a member state presents multiple problems the obvious connection with defence and security issues has inhibited the ecj which still has not given an authentic interpretation of this article as the recent former yugoslav republic of macedonia from cases greek referral for the embargo on from indicate unless the use of art 224 is blatantly flippant the ecj is not in a position to challenge a member state's unilateral measures

routledge handbook of the economics of european integration provides readers with a brief but comprehensive overview of topics related to the process of european integration in the post world war ii period its short chapters reflect the most up to date and concise research written by a collective of experts on their own subjects the aim of this book is twofold firstly the text illustrates the broad and diverse range of issues associated with european integration and lastly the key approaches and findings are summarised since institutional integration in europe is an ongoing process with possibly frequent and sometimes rapid changes the chapters are intended to focus on the key features of the economic analyses of these topics a wide and diverse set of economic issues is of direct relevance for european integration these topics cover various fields ranging from the history of the european economic and monetary union eu trade policy and the stability of international trade single market issues over fiscal monetary and other policies the crisis that faces the euro area and institutions such as eu council of ministers not surprisingly many of these issues have also been analysed from a european perspective this handbook is designed to provide students researchers the public and policy makers with ready and accessible knowledge of issues related to european integration and will provide the definitive overview of research in the area
